*Social Explorer is widely available database accessible via many institutional subscriptions. The data utilized in this study was downloaded via the “Tables” link in Social Explorer. The ACS 5_Year estimates were downloaded for each state and county for even years 2009-2022,

with 2009 treated as 2008 for the purpose of calculating 4-year rates of change in 2012. More detailed information on the downloading process and variables utilized are presented in the Readme file for data replication.
